

Thank you for downloading the "RESTROOM (5 games bundle) trial version".

In this file, you can enjoy the title work "RESTROOM".

In addition to "GAME", which is the main part of the game,

"OSAWARI" without the game elements, and "OSAWARI" also has an automatic animation playback function.

I hope you enjoy it.

[HOW TO START THE GAME]

Playing the app from media such as USB may not work properly.
Be sure to move the data to the desktop of your computer and play.

WINDOWS

Open "RESTROOM_trial.app" in the "windows" folder and double-click "RESTROOM.exe".

MAC

Double-click "RESTROOM_trial" in the "mac" folder.

[TROUBLESHOOTING]

Where is ANIME mode?

ANIME mode has been integrated into OSAWARI mode.

In OSAWARI, press and hold "background" or press "↑" on the keyboard to automatically play the animation.

I can't remember my password.

You can enter with "*****".

The operation is strange. / The app won't start.

There are two possibilities:

① Launching application from other than desktop

If the application is launched from other than the desktop, delete the entire folder containing the application. (If you don't delete it, even if you double-click the application you added later, the first application will start up.)

Next, please re-download the app in case the file may be corrupted.

Save the downloaded application to your desktop and launch it from your desktop.

② The configuration file is corrupted

The operation may be strange due to an error in the configuration file.

You can initialize the settings file by holding down the "C" key on the keyboard during "NOW LOADING" before the HOME screen is displayed.

(Hold down the "C" key until the setting initialization screen appears.)

Please note that initialization will reset the settings of all games.

I want to move the game settings to another computer.

You can export the setting data from "CONFIG" on the home screen.

Click the export icon to create a settings file named "restroom-app.ooo" on your desktop.

To load the exported settings file, drop "restroom-app.ooo" on the import icon.
