

How to make a figure

# 0. Preparation

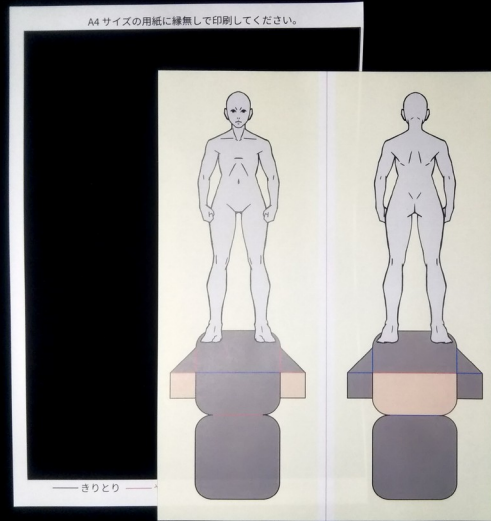

♀ Please prepare the following.

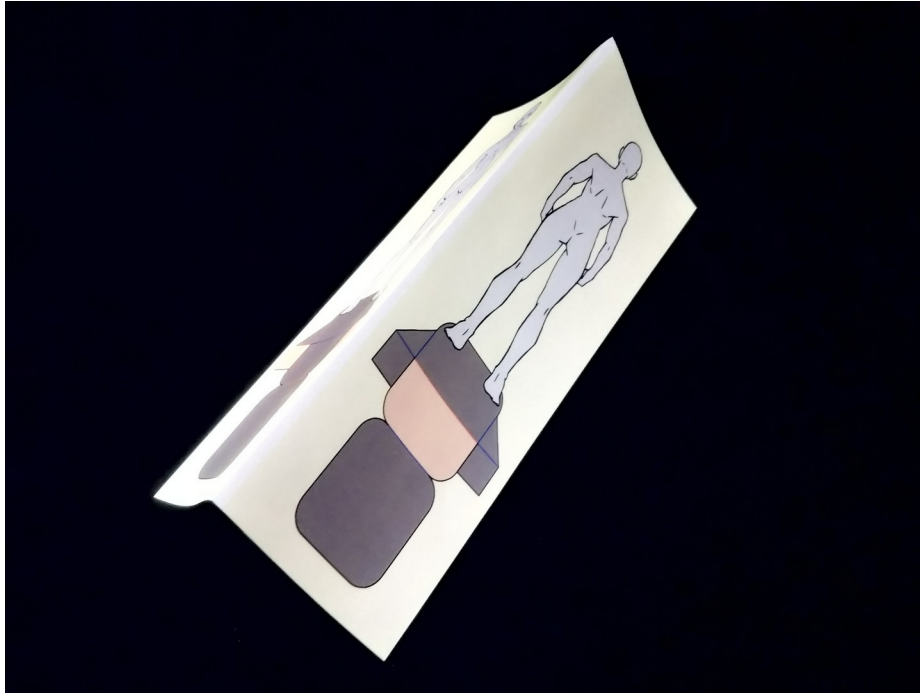

- ♀ Printed original paper (A4, no margin)
- ♀ Ruler
- ♀ Glue (less moisture)
- ♀ Utility Knife
- ♀ Cutting mat
- ♀ Thick paper
- ♀ Paper clip (optional)

# 1. Cutting

♀ Cut out the outer frame.

## 2. Folding

♀ Fold it in half.

♀ Scoring along the center line with the back of a utility knife will make it easier to fold.

# 3. Applying Glue

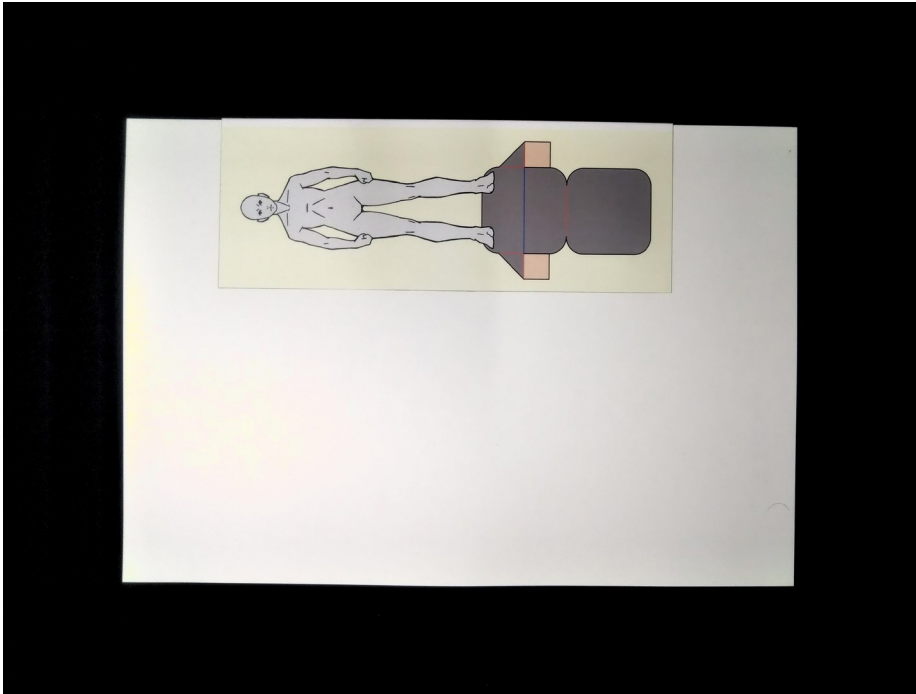

♀ Apply glue evenly to the entire back surface.

♀ Fixing it to the back of a cutting mat with clips will make it easier to apply glue.

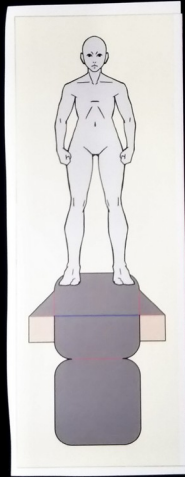

## 4. Pasting

♀ Paste it onto the thick paper so that it is sandwiched.

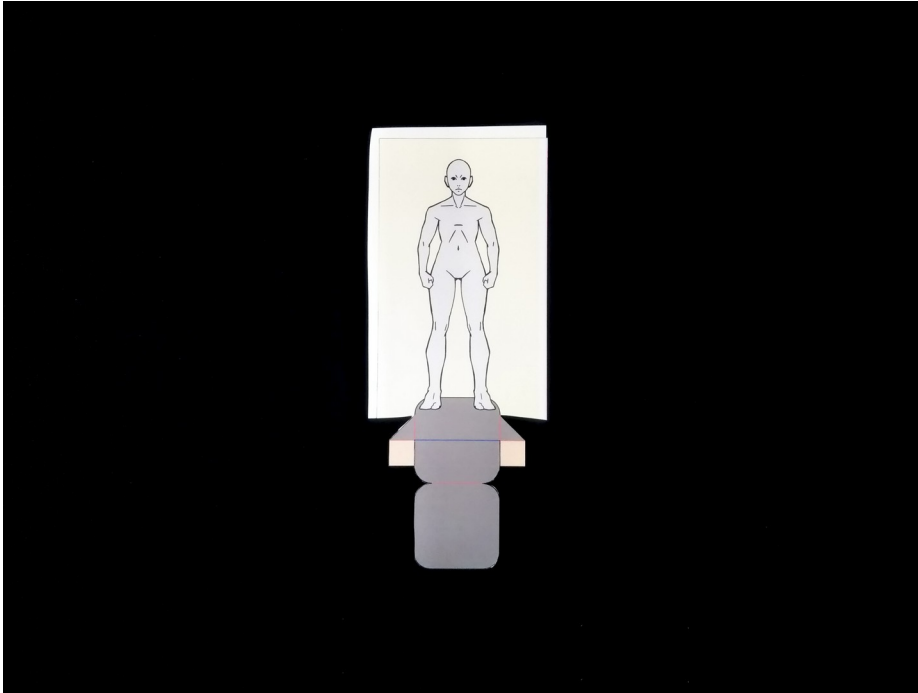

# 5. Cutting Out

♀ Cut out the unnecessary parts

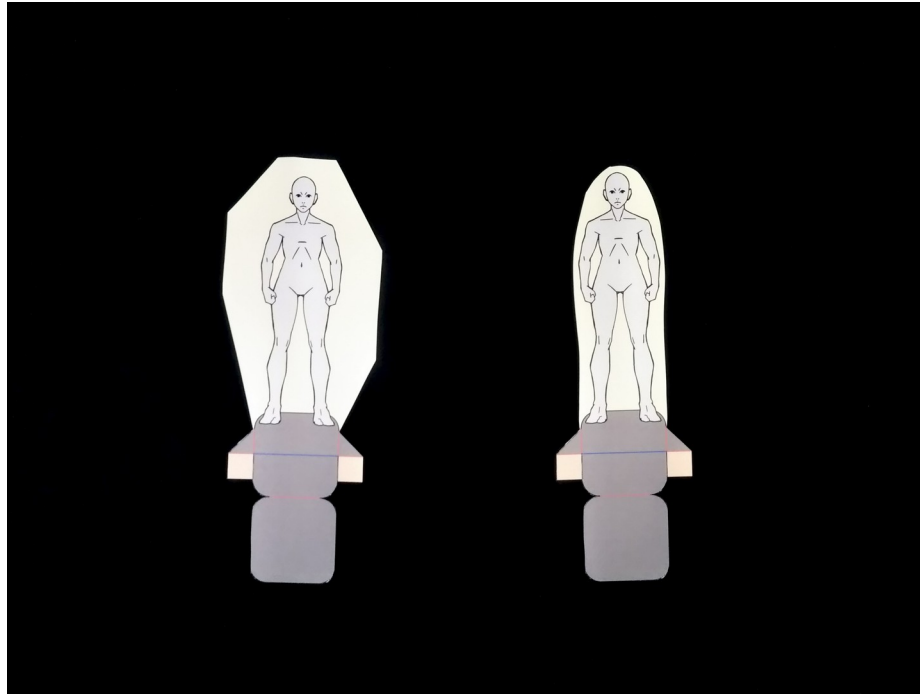

# 6. Cutting Out The Base

♀ Cut out the base.

# 7. Cutting Out The Body

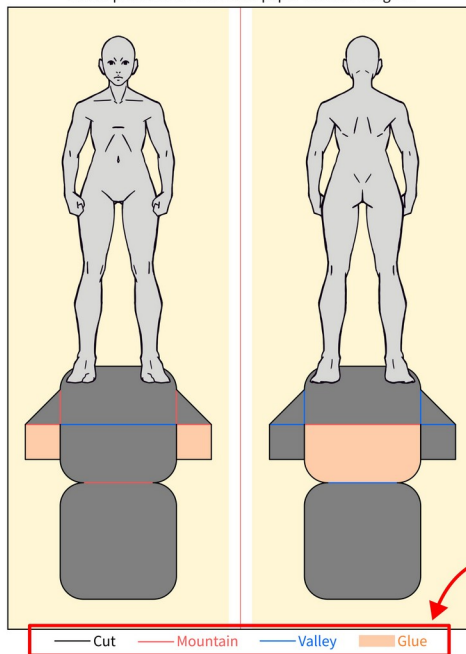

♀ Cut out the body.

♀ First, cut out the rough shape,  
and then cut out the details.  
This will make it easier to cut.

# 8. Folding The Base

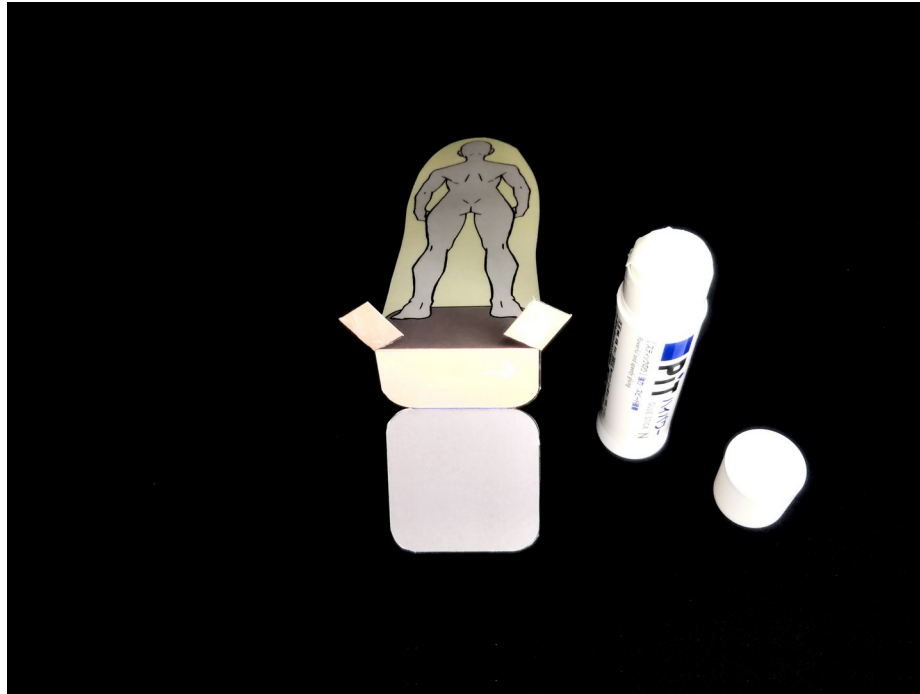

Please print this on an A4 size paper without margins.

♀ Fold the base as shown in the picture.

♀ Please refer to the instructions written at the bottom of the original paper.

# 9. Glue The Base

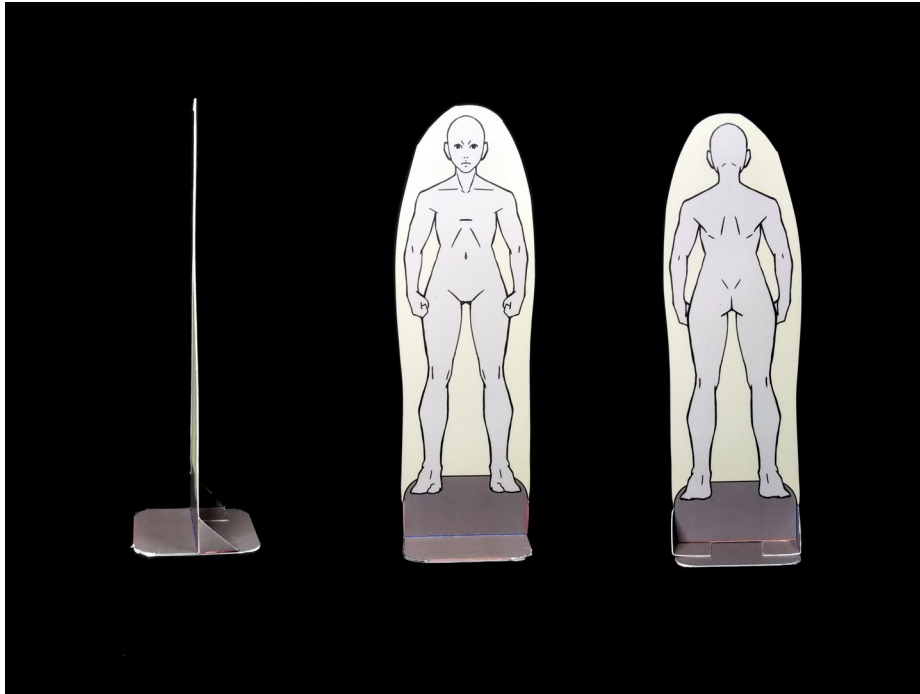

♀ Apply glue to the base.

♀ The orange part of the figure is where you should apply the glue.

# 10. Paste and Completion!

♀ Paste it as shown in the picture...

# Done!
