<Game Overview>

 This is an adult game that focuses on the practicality of doing naughty things to U10, a popular avatar for VRchat. I have done my best to make this game as satisfying as possible, and I hope you enjoy it.
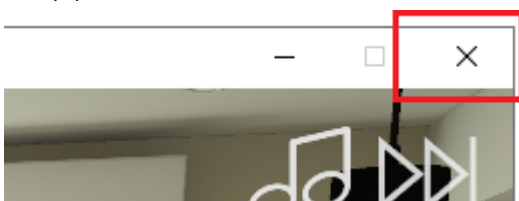

<Start & End>

---

(1) Start: Double-click the executable file (.exe)

(2) Exit: Click the X button

<Game Operation>

 Basically, you can play using only the left mouse button, but you can use the keyboard for moving the cursor in the selection menu.

Arrow keys up/down: move cursor
Enter key: Decide
Back Space: Cancel

Is it OK if I use U10-chan!? - Manual -

<Basic Flow of the Game>

---

   (1) U10-chan patrols the room.
   (2) Increase U10's sexual arousal level.
   (3) Undress U10-chan.
   (4) Insert the stick into U10-chan.
   (5) Increase U10's pleasure level.
   (6) Climaxing U10-chan.
   (7) Nakadashi or bukkake during U10's climax.
      (Used 1 time count, Maximum Ejaculatory Power 1 up)
   (8) U10's pleasure and sexual arousal levels settle down* and she returns to his original
      patrolling behavior. (* Less than 10% of pleasure at deep in the vagina、Sexual
      excitement is not yet 50%.)

<Screen Description>

---

(1)Creating New Data : You can create black and purple U10-chan with different looks.
(2)Open saved data   (3)Writing data (You can also delete)
(4)View U10's Sexual Feelings information (5)BGM volume switch (Playback <- -> Mute)
(6)BGM selection button (Total 9 songs)   (7)BGM number currently playing
(8)Current Time : Morning, noon, evening, and night time periods exist, and the outside
scenery and first conversations change.
(9)conversation button : U10-chan will talk to you about the situation.
(10)undress button : U10 can undress with a sexual arousal level of 50% or higher.
(11)ejaculatory power : Current ejaculation power/maximum ejaculation power
(12)Horny Gauge : U10's level of sexual arousal
(13)Number of times used : Number of times I ejaculated on U10
(14)Display credit screen   (15)changing clothes button
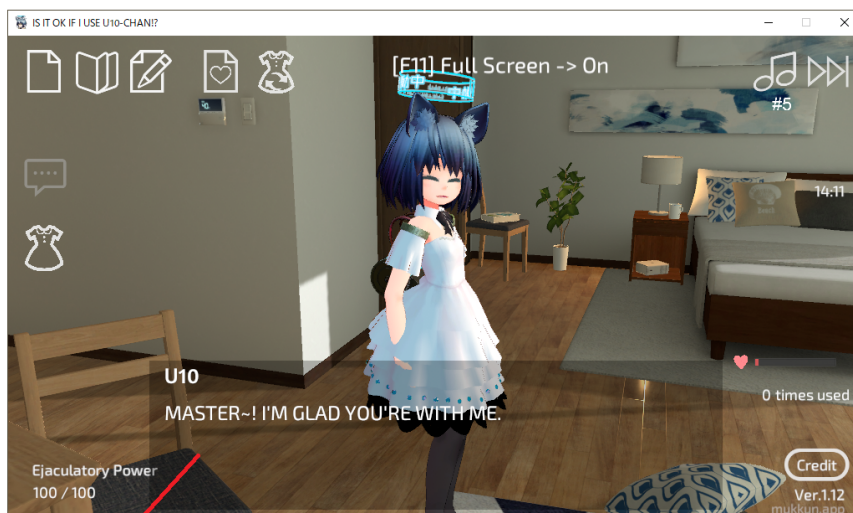

<Sexual Feelings Information>

Click on the circled button to see the sexuality feelings information. Sexuality rises when you click on the sexuality zone. The higher the sensitivity, the faster the horny gauge rises.
Sexual zone: lips, tits, nipples, pussy, buttocks, and anus

Click

Sexual Feelings Informaton

<About the Conversation>

By pressing the Conversation button, a conversation will be displayed for each situation. Three types of conversations are available for each situation, and they are displayed in the following order: 1->2->3->1. Conversations occur automatically during sexual activity. The conversation window is automatically closed without any particular action.

Conversation Window

<insert button>

 When U10-chan is undressed, the insert button appears instead of the undress button. U10 can be inserted with a sexual arousal level of 90% or higher. The insertion point changes depending on U10's pleasure level and behavior at the time. After insertion, pressing the button initiates the piston, and further pressing changes the position.

<About undressing>

 As noted earlier, U10's sexual arousal level of 50% or higher allows her to undress, but she can also undress in certain locations (bathroom, laundry).

<About Ejaculatory Power>

 Ejaculatory power represents the amount of ejaculate that can be ejaculated into U10chan. (20 consumption per shot)
Once ejaculation is initiated, ejaculation does not end until it reaches 0. When ejaculation ends, the maximum ejaculation power is increased by 1. (Limit 200)
 Ejaculatory power is restored to its maximum value over time.

<About Horny Gauge>

 Clicking on U10's sexual zones increases her sexual arousal level.If successful, a heart effect will be displayed. A series of clicks is required to build up the horny gauge.

Horny Gauge

<U10's action>

U10 moves freely around the room and acts according to her desires.

Locations to patrol:
  Living room, closet front, bed, kitchen, toilet, laundry, bathroom

U10's patrolling behavior:
  Moving, standing, squatting, sitting upright, girl sitting, crawling on all fours, lying down

Special behavior:
  Masturbation : If the level of sexual arousal is 90% or higher, they will undress and
                 masturbate by themselves in a specific place (bed, bathroom).
  Dressing : When pleasure and sexual arousal level are calm (*1),
             they are clothed in a specific place (*2).
      *1 Less than 10% of pleasure at deep in the vagina,
       Sexual arousal degree of 50% is not yet satisfied
      *2 closet front, bed, laundry

<U10's relationship between sexuality and pleasure>

The areas where U10 feels pleasure are the nipples, pussy, anus, deep in the vagina, and head. When pleasure is felt, a pink effect is applied to the area.
Nipple, pussy, and anal pleasure increases with stimulation of the sexual zones.

Parts that increase pleasure by sexual zone:
 Breasts, nipples -> Nipples
 pussy -> pussy
 Buttocks, Anal -> Anal
 Lips -> None *Horny gauge only

Pleasure at deep in the vagina increases in response to nipple, pussy, and anal pleasure.The pleasure at the head increases in response to the pleasure at deep in the vagina, followed by a faster heartbeat and climax.

Order of increasing pleasure:
 Nipple, pussy, anal -> deep inside womb -> head -> climax

<About changing clothes>

This function was added in Ver. 1.10, and allows you to change U10-chan into another outfit.
Use this function when you want to change your mood. You can make U10 change her clothes even during sexual intercourse. Some of the animations may cause some of the outfits to break, but we hope you can tolerate this.

<About transferring saved data>

 If you want to continue to use the data saved during version upgrades, etc., copy the files in the following locations to the same hierarchy before launching the game.

 [Main] -> [U10ChanIIndesuka_Data] -> [SaveFile.es3]

<Finally>

 If you find any problems or bugs with the game Please contact us at the address below.
If you have any comments or requests, please let us know as well.
